

DIESEL

Pramac offers one of the widest ranges of diesel generators for professional use.

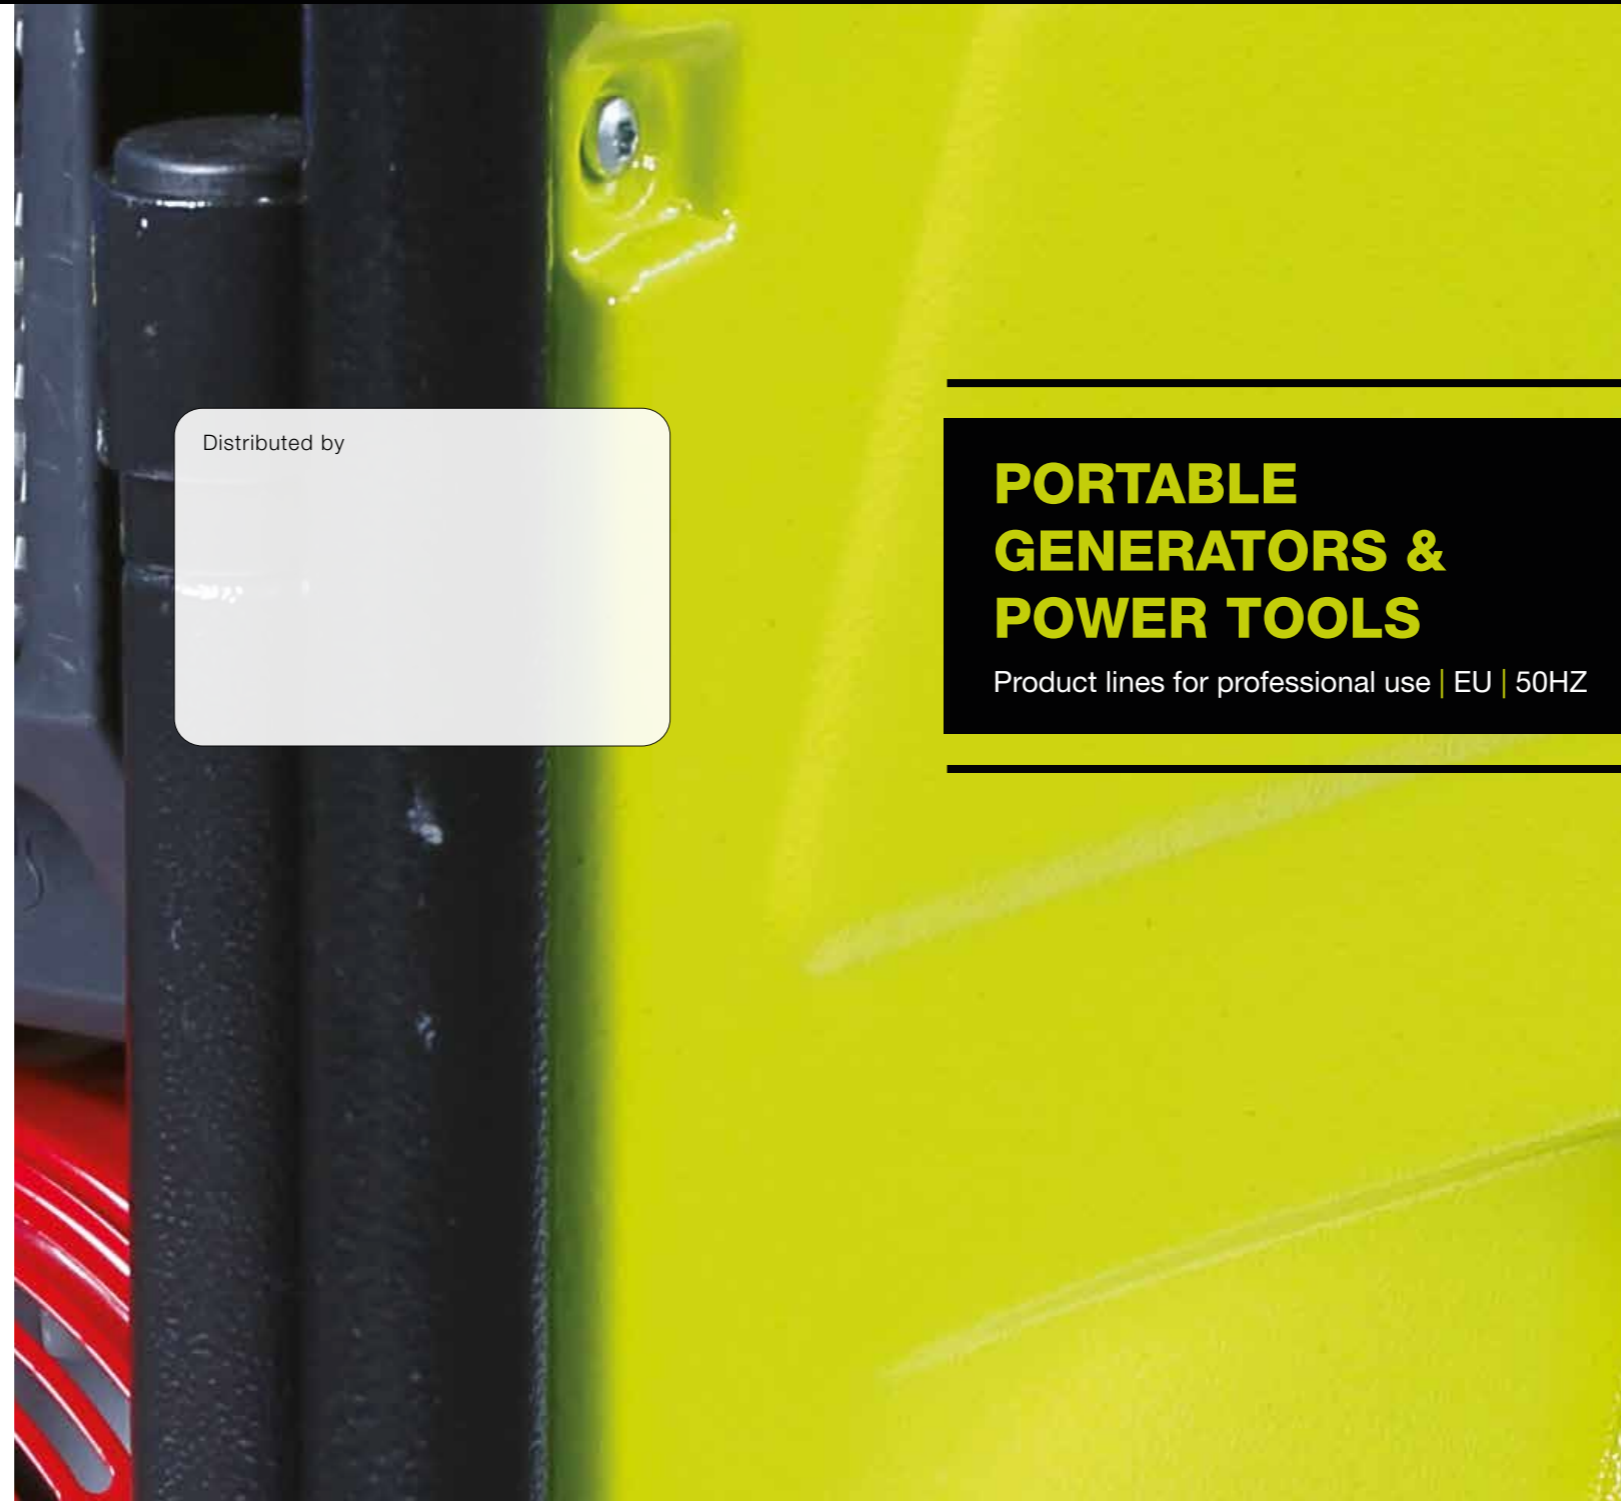

- **E Series** matches your essential needs with its no-frills configuration- light, compact and portable. Excellent value for money.
- **S Series** combines robust products with modern and economical fuel-efficient diesel engines, delivering safety and reliability in the toughest working environments. A comprehensive options portfolio is also available for customizable control panels, ensuring the **S Series** boasts the Pramac excellence across all its professional equipment.
- **The P Series** air-cooled and water-cooled equipment is engineered with soundproof canopies, to provide trade grade performance with attenuated sound level. For low noise levels, you can rely on the **P super-silent Series** air-cooled generators. All units are designed to be easily moved in construction yards and engineered to be the performance benchmark in the industry.

PETROL

Pramac petrol generators cover the broadest range of field applications.

- **E Series** matches your essential needs with its no-frills configuration- light, compact and portable. Excellent value for money.
- **The ES Series** provides the convenience of a long run fuel tank and roll cage protection for a robust design.
- **PX Series**, with its compact yet protective side rails, combines endurance and functionality, efficiency and reliability and it is ready for intensive use.
- **S-SP Series** is the premium professional range with top class quality components. These highly configurable generators are equipped with digital display and socket set. Optional extras include differential or isolated protection and IP54 sockets for ultimate site protection. Full control panel and long run tank are amongst the most popular features in the series.
- For more power, you can rely on the Petrol **P Series**- air-cooled generators with top end performance and low noise levels. When the target is to provide clean and stable power with a low harmonic distortion for sensitive electronics, the **Inverter P Series** offers a state of the art, easy to carry, fuel efficient generator with low noise levels, along with its unique **POWERRUSH™** feature.

***POWERRUSH™** more starting capacity allowing you to do more with less: Increases electrical current upon demand, above rated output when starting electric motors.

PORTABLE RANGE

Pramac portable power systems are conceived for professional application and work in tough environment. The wide product offering includes diesel and gasoline power generator sets, water pumps, pressure washers and welder generators. Quality, efficiency and high product standards are achieved through the use of modern design and manufacturing techniques, exceeding international regulations for noise and environmental pollution.

POWER TOOLS

PTO SHAFT GENERATOR

TG Series

PTO generators are a safe and versatile power source able to generate low cost efficient power for any kind of agricultural use.

PRESSURE WASHER

PW Series

Petrol and diesel driven cold water high pressure washers designed to meet your professional and recreational demands.

WELDER

W Series

Welder generators specifically designed for small repairs, or for more advanced applications. Up to 220A you can use rutile, basic or cellulose electrode up to 5mm diameter.

MOTOR PUMP

MP Series

Whenever it is necessary to move large quantities of water, facing a flood or simply filling a pond, these petrol powered pumps are your perfect ally.
